

316L SS Junction Box

JB-8 or JB-8-120

UL Listed for underwater installation
5 1/2"W x 5 1/2"L x 3 1/2"H
Volume is 39 cu. in. or 640ml
Tempered glass viewing lens with silicone gasket
316L SS lens frame and cover
4 to 8 x 1/2"NPT side outlets can be provided
3/4" NPT for conduit on bottom
UL listed nickel plated brass cord seals
Certified for underwater low voltage lights or 120V
lights connected to interior ground screws and an
exterior bonding screw

The removable 316L SS cover protects our interior glass viewing lens. The tempered glass is sealed with a silicone gasket and SS face ring just like our lights. Removal of the SS cover provides a quick look inside the junction box without disturbing the water tight seal.

All underwater installations require approved potting compound and thread sealant to prevent water entry. Failure to do so may damage the lights and will void any manufacturers warranty.
